Reviewer-1
1. Results explanation required. 2 paper must be formatted as per conference template. 3 related work requires updation and cite latest references of year 2023 and 2024. 4 methodology requires refinement, architecture is not explained by authors. 5 conclusion may have future scope and limitations

Reviewer-2
The survey article is good but authors need to add the challenges related to the study along with tentative solutions and future direction. This will be beneficial for the readers of this paper.
A comparative study may also be shown in graphical form.
Language must be improved as there are linguistic errors at some places.
The paper must be within 12 pages at max and minimum 8-pages.
Table, figures and references must be clearly specified and cited in the text.
